

Knot Filler Saver

For saving Knot Filler between colour changes

When you work with different Knot Filler colors it is useful to have the Knot Filler Saver at hand. With the Knot Filler Saver it is possible for you to form new Knot Filler sticks. This means that you do not have to discard excess Knot Filler.

Instead you easily form new sticks of Knot Filler until the new colour has run through the Knot Filler gun and it is ready to use. Save the new sticks in a closely sealed alu bag! Then you have new Knot Filler sticks to use for later woodwork.

Instruction

1. Place the Knot Filler Saver on a metal surface or use masking tape on the bottom to close the holes.
2. Fill the Knot Filler Saver from one of the sides. Use the hole to the left or right.
3. Do not fill the small hole in the middle. That is for ventilation purpose.
4. Leave the Knot Filler to harden. Drying time is approx. 15 min. Push out new sticks and seal them closely in a bag.
5. Notice! The new shaped sticks might have an uneven shape. This does not influence the later application.

Size:

Width: 4,5 cm
Depth: 3,5 cm
Height: 5,5 cm

NOTICE!
The flexibility of the Knot Filler sticks change a bit after they have been reshaped in the Knot Filler Saver.

The perfect match

Wood Repair Pro Kit

The Knot Filler Saver is a perfect supplementary tool for our professional Wood Repair Pro Kit. Add it to your Wood Repair Pro Kit as an extra useful tool for your Knot Filler repairs.

It is important to tightly seal the new sticks in aluminum bags after they have hardened!
